

Chief's Report August 2022

-Ember Alliance is starting to write their report. There will be a short meeting September 9 with large stakeholders (Representatives from IHIA, Geneva Glen, Leprino's property, etc.). This is a pre-meeting for a larger public meeting that will happen in late September (date not determined). There are not enough people completing the surveys to get the snapshot they're looking for (if you haven't completed one, and you're reading this, please complete one now and give one to a neighbor).

-Big Chili is coming up on September 10th. We could use all hands on deck to help out with this event. If you're interested, please let Marc know.

-We applied for a state PPE grant. \$5 million available, \$13 million in applications. Main need is for new air packs for our department, which was an eligible item and ours are approaching end of life. We should know by mid-September. The same grant will be available next year, but others will know about it and it was a short turnaround this time, so next time more people will get in on it. If we don't get this one, we should pursue an AFG grant in December for air packs.

-Paramedic Academy - approaching the home stretch. Two more Clinicals and I'll be starting my Capstone rides with Stadium Medical in Golden

Calls for August:

2-MVAs

1- wildland fire (mutual aid

5-Medicals

1-Gas Leak

1-Citizen assist

10 Total for August

113 year to date total (about 20 ahead of average for this time of year, mostly in the last couple of months)
